About Me

Experienced Angular Ionic developer proficient in Angular, Ionic, Node.js, Express.js, Sequelize, and MongoDB. Proven track record in designing dynamic, responsive, and user-friendly web and mobile applications. Collaborative team player with strong problem-solving skills and a passion for staying updated with industry trends. Ready to drive innovation and success in your organization.

Professional Experience

DI Solutions | Frontend Developer
July 2022 - Present

Frontend Developer at DI Solutions since July 2022, contributing to the creation of modern and visually appealing web and mobile applications. Collaborating closely with senior developers and designers, I've gained hands-on experience in front-end technologies, including HTML, CSS, JavaScript, and various frameworks like Angular and Ionic.

Projects

Rewaa POS

- The goal was to modernize the platform, enhance load times, and create a mobile application.
- **Implemented Offline Mode:** Designed and developed a robust offline mode feature, enabling clients to seamlessly continue selling products even without an internet connection.
- **Integrated Firebase Push Notifications:** Successfully integrated Firebase Cloud Messaging (FCM) to enable push notifications within the application. Empowered administrators with the capability to send real-time alerts and updates to users, enhancing user engagement and communication.

MyGolf2u

- **Implemented real-time chat feature** enabling seamless communication between users and administrators for golf package bookings.
- Successfully migrated and upgraded an Ionic 3 project to the latest Ionic 7, ensuring modernization and improved performance.

Project which I migrate to ionic 7

- Revierjagd Luzern  
- Teooria.ee  
- CardioVisual: Heart Health App
